

COLLISIONS SMARTAPP

Simplify Collisions Documentation with Mobile Reporting

The Collisions SmartApp simplifies and speeds up reporting collision incidents. Users can effortlessly document and submit comprehensive details of any collision directly from their smartphones or tablets. The Collisions SmartApp empowers users to act swiftly and accurately by allowing users to ensure critical information is captured and transmitted in real time. By providing a user-friendly interface and intuitive features, such as photo documentation and GPS tagging, the Collisions app allows fleets to have proactive incident management.

The Collisions SmartApp is included as part of the MobileFocus Enterprise suite.

Key Features:

- **Photo documentation** – capture and attach photos
- **Comprehensive incident documentation** – date, time, location, and vehicle details
- **Accessible on any internet-connected device**
- **Real-time submission** – reports submitted instantly on the application

Looking to have drivers easily document incidents with comprehensive details and photo evidence using just a mobile device?
